Preparation

This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, E. coli-derived, recombinant human Cerebullin-1 globular form, His Tag on N-Terminus. That antibody was purified by Protein G affinity.

Formulation

100 µg of Anti Human Cerebullin-1 monoclonal antibody in 100 µl of PBS lyophilized form.

Reconstitution and Storage

Add 100 µl deionized water to the vial to prepare a antibody stocking solution (100µg/ml). Stores it at 4°C for a few days. For long term storage, the reconstituted antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C **in a manual defrost freezer** for 12 months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity

This antibody has been selected for its ability to recognize recombinant human Cerebullin-1 globular form in indirect ELISA.

Applications

Indirect ELISA - This antibody can be used at 1:4000 (0. 25 µg/ml) to detect human Cerebullin-1 globular form on indirectly ELISA.

Optimal dilutions should be determined by each laboratory for each application.
