

LED HID High Bay Retrofit Series

The ProLED® HID High Bay Retrofit Series lamps are an easy to install LED replacement for 400W Metal Halide lamps. Designed specifically for high bay luminaires, and offering up to 130 LPW efficacy, the directional design offers the most effective way to deliver an equal amount of light to the work plane when compared to omnidirectional metal halide sources. The unique passive cooling design, louvered heat sink to minimize dust intrusion, and 50,000 hour useful life, combined with the ability to eliminate the ballast ensure that luminaire maintenance is a thing of the past.
