

## TruLink 4-in-1 Tape Connector

**This multipurpose connector** is designed to make installations faster and easier. The Trulink connector can be used as a power connector, splice, jumper, or T-connector for Trulux single color tape light. Available as a connection block (TL-BLKS, sold in bags of 10) or as a power connection kit accessory including 36" 18AWG lead wire (TL-CONKIT).

- 4 compatible connection types
- Reliable connection every time
- Quick and easy installation
- Can be used with IP54 (unjacketed) or IP65 (jacketed) Trulux tape light
- Durable and compact construction
- Attached 3M adhesive tape

**TL-CONKIT**

(Quantity 10)

## TRULINK 4-IN-1 CONNECTIONS

### Wire-to-Tape

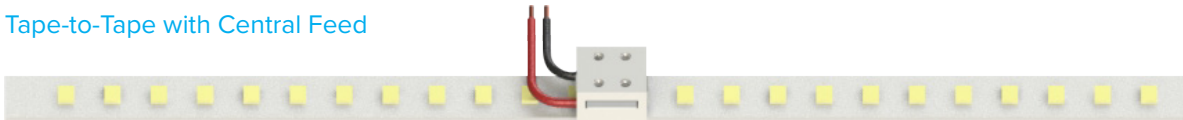

### Tape-to-Tape Splice

### Tape-to-Tape Jumper

### Tape-to-Tape with Central Feed

## COMPATIBLE TAPE LIGHT

**SINGLE COLOR**  
(UWX, UWW, WW, WH)

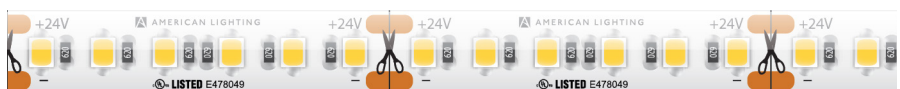

Standard - IP54 / IP65\*

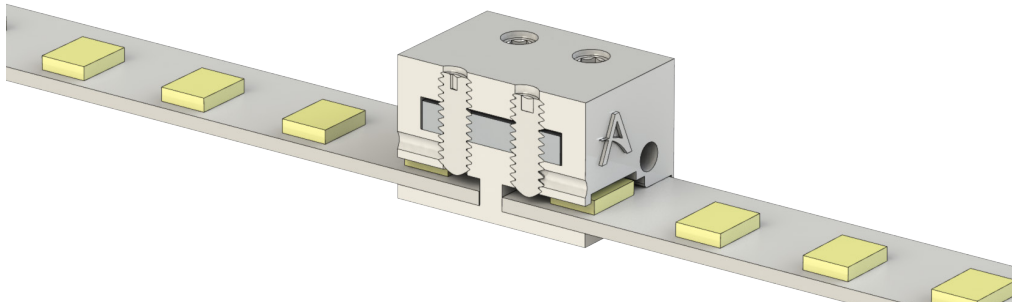

High Output - IP54 / IP65\*

Spec Grade - IP54 / IP65\*

**\*IP65 Modification:**

You will need to remove the first 1/4" of protective coating at the cut end in order for tape light to fit into the TRULINK Connector.

## TAPE LIGHT BEST PRACTICES

### How far do I need to push the Trulux tape light into the TruLink connector?

Slide the tape light far enough into the TruLink connector to ensure the copper conductors can make a connection once screws are tightened

### How much should I tighten the screws on the TruLink connector?

Ensure screws are tightened so that they make connection with the copper conductors on the Trulux tape light; one should be able to tug on the tape light gently without interrupting the connection

### What is this coating on the IP65 tape light?

A slight modification to IP65 tape light will be needed because of its protective coating. Start by removing the protective coating from the tape using a utility knife to expose the conductive pads. Too much pressure, over sanding, or scraping can lead to damaged conductor points. Once completed, you can finish your installation according to the product's instruction manual.

### Extrusions:

The TruLink connector fits in most Trulux extrusions, including Surface Mount:: Olin

Recessed mount: Double Flange, Universal, Drywall Slot, Mini Flange Slot, Flange Slot, Invisible Slot, Paver

### Making a custom jumper with the TruLink Connector:

When jumping between sections of tape light using a Tape-to-Tape jumper set up, be sure to consider voltage drop
